

Rainer Kossak is Director for Special Projects for Novelis North America.

Rainer has studied metal physics at the University of Goettingen and holds a Diploma and PhD in solid state physics. Rainer started working for Alcan – Aluminum of Canada – more than 30 years ago. The company name changed after a merger with Alusuisse and Pechiney to Novelis in 2001. Rainer held various management positions in various Alcan plants in Germany, Switzerland and in the Novelis plant in Oswego, NY state. He changed to the Novelis Novi office in Michigan 4 years ago. Over the last few years Rainer has mainly coordinated development activities with Audi, BMW in Europe and Ford, GM, FCA and Toyota in North America.
