

Dr. Mehdi Shafiei joined Novelis Corporation in 2012 as Technical Project Leader, and later as Technical Competency Leader for Global R&D, focusing on improving manufacturing processes, enhancing quality of products, and developing innovative products and technologies in partnership with OEMs, commercial teams, manufacturing plants and R&D groups. Currently, he works with Novelis Technical Development Team in Novi, Michigan as Technology Manager for Advanced Automotive Applications. In this role, he is responsible for supporting the development of innovation strategies, road maps and R&D platforms in alignment with business strategies and customer needs. Before joining Novelis, he worked with General Motors Research Chair in Canada for eight years as Laboratory Manager and Research Scientist. Dr. Shafiei resides in Farmington Hills and enjoys hiking, biking and travelling.
